Education

2015	Ph.D. Ecology & Evolutionary Biology, University of Michigan Dissertation: The Drivers of Acute Seasonal Infectious Diseases Committee: Pejman Rohani, Aaron A. King, Mercedes Pascual, & Betsy Foxman
2009	B.S. in Biology, University of Alaska Southeast, Magna Cum Laude
2009	B.S. in Mathematics, University of Alaska Southeast, Magna Cum Laude

Personal Statement

I deconstruct epidemics. The shape, frequency, and magnitude of epidemics collectively contain information about host-to-host transmission, immunity in the population, and importation of infection; I use cutting-edge statistical methods and dynamic models to extract that information. I work at the intersection of epidemiology, computational biology, chronobiology (the study of biological rhythms), and ecology. My traditional training in biology, coupled with my research in computational and applied mathematics and statistical inference, has allowed me to develop **my unique expertise: leveraging epidemiological data to unmask population-level biological processes that impact human health**. My current research focuses on computational biology and I am expanding my program to also include clinical research on cross-systems biological rhythms (i.e., high temporal resolution immunology, endocrinology, metabolomics, and transcriptomics). **My ongoing research falls into four themes: (1) seasonal disease transmission, (2) maternal immunity, (3) the realized effects of vaccines, and (4) interactions between biological rhythms and disease**. First, I have quantified the transmission seasonality for both polio and measles and have now expanded my studies to include herpesviruses. The quantification of seasonal transmission is of practical importance because it can be used to identify windows of time when pathogens are vulnerable to being driven to extinction by vaccination and containment. Second, I am developing a novel mathematical modeling framework for integrating serology data with disease incidence data to better understand maternal immunity and disease in infants. Maternal immunity in infants has significant public health implications, since the duration of maternally-derived antibodies shapes the infant vaccination schedule. Third, I have constructed a statistical inference pipeline for quantifying vaccine modes of action using disease incidence data that span vaccine-free periods and continue through licensing and vaccine roll-out. I am currently using this pipeline to measure the efficacy of inactivated and live polio vaccines. Fourth, I have developed a clinical study, funded through the NIH Early Independence Award, to characterize functional seasonal rhythms in the human immune system. Overall, my long-term goal is to study the extent to which the human immune response is integrated with biological clocks and to understand the impact of clocks on disease dynamics to improve medical interventions and disease control.

* formerly Micaela Elvira Martinez-Bakker

Grants & Fellowships

2018–2019	NIEHS Center for Environmental Health in Northern Manhattan (\$30,000)
2017–2019	NIH Loan Repayment Program: NIAID Pediatric Extramural (\$14,797)
2016–2021	NIH Director's Early Independence Award. (\$1,802,109)
2015–2017	National Science Foundation Postdoctoral Fellowship in Biology (\$120,000)
2010–2015	National Science Foundation GRPF (\$135,000)
2010–2015	University of Michigan, Rackham Merit Fellowship (\$70,400)

Book Chapters & Manuscripts in Preparation

2015	Micaela E Martinez-Bakker . The Drivers of Acute Seasonal Infectious Diseases. <i>A dissertation submitted in partial fulfillment of the requirements for the degree of Doctor of Philosophy (Ecology and Evolutionary Biology) in The University of Michigan</i>
2013	Micaela Martinez-Bakker . The Low Arctic Tundra, book chapter in Encyclopedia of Biomes and Ecosystems, Salem Press. ISBN: 978-1-4298-3813-9.
2013	Micaela Martinez-Bakker . The High Arctic Tundra, book chapter in Encyclopedia of Biomes and Ecosystems, Salem Press. ISBN: 978-1-4298-3813-9.
in prep	Micaela E Martinez , Liubov Kozlovskaya, Pejman Rohani, and Aaron A. King. Both Salk and Sabin Vaccines Effectively Reduce Polio Transmission in Epidemic Settings. (Published in dissertation, in preparation for peer-reviewed publication). Available at https://deepblue.lib.umich.edu/handle/2027.42/113643
in prep	Micaela E Martinez , Rob van Binnendijk, Hayley Gans, Andrea Graham, and Jacco Wallinga. Flipping the Infant Measles Vaccination Schedule.
in prep	Kevin Bakker and Micaela Elvira Martinez . The Ecological Underpinnings of Disease Co-Seasonality.
in prep	Jacob J Burkhart, Stephanie K Sell, Ole Nielsen, Micaela Martinez-Bakker , Dave Tallmon, Brendan P Kelly, and Bradley J Swanson. Isolated Bays Reduce Gene-flow in Ringed Seals (<i>Pusa hispida</i>), a Highly Mobile Marine Mammal

Students Mentored

2018	Master's of Public Health Students: Zining Zhang, and Pei Yang Hsieh. (Columbia University)
2015–2018	Thesis students: Jesus Cantu, Aria Alexander, Daniel Navarrete, and Mallika Viswanath. Research Assistant: Annalise Russo. (Princeton University).
2013	Emilia Iglesias, University of Michigan, Summer Research Student. Characterizing the Seasonality of Alzheimer's Disease. (Graduating class of 2016)
2011	Busola Alabi, University of Michigan, Summer Research Student. The Seasonality of Contemporary Polio Epidemics in Africa. (Now a 1st year PhD student)

International Collaborations

- 2018–2020 **Universidad de Murcia (Murcia, Spain)**. I have begun a collaboration with the chronobiology lab of Juan Antonio Madrid Perez. We are using their new wearable device technology to study circadian rhythms, sleep-wake cycles, light-exposure, and activity in humans throughout the seasons.
- 2018 **Universidade de So Paulo (So Paulo, Brazil)**. The Universidade de So Paulo has awarded funds for me to spend time at their School of Public Health. I am establishing a collaboration with Prof. Claudia Roberta de Castro Moreno focused on human birth seasonality in the tropics and Southern Hemisphere.
- 2016–current **University of Surrey Clinical Research Centre (Surrey, United Kingdom)**. I am the PI on a funded grant in collaboration with colleagues from the University of Surrey. We will be conducting a clinical investigation of unprecedented scope to advance our understanding of seasonal biological rhythms in the human immune system.
- 2015–current **Netherlands National Institute for Public Health and the Environment, RIVM (Bilthoven, Netherlands)**. I am working with scientists at RIVM to determine the optimal dose timing of the measles, mumps, and rubella vaccine (MMR) with regard to maternally-derived antibodies in infants. I am using RIVM's extensive cross-sectional immunological survey, which contains the antibody profiles for ~ 8000 individuals, including over 400 infants.
- 2014–current **University of Glasgow (Glasgow, Scotland)**. I have a long-standing collaboration with chronobiologist Barbara Helm. We have co-authored three manuscripts together, including a manuscript recently published in PNAS. In 2018 we were awarded a grant to study the effects of light pollution on human health.
- 2015–current **Chumakov Institute for Poliomyelitis & Viral Encephalitides (Moscow, Russia)**. The Chumakov Inst. conducted the trials for the live polio vaccine (OPV) in 1959. I am working with the Chumakov Inst. to improve estimates of the efficacy of OPV in epidemic settings (using their vaccine trial data). This research is timely because worldwide withdrawal of trivalent OPV began in 2016, and OPV will be reserved for epidemic response.

International Presentations

- scheduled 2018 | Max Planck Institute for Ornithology (Seewiesen, Germany). Wild Clocks 2018. Equatorial/tropical rhythms, session co-lead, along with John Wingfield (UC Davis).
- 2018 | Universidade de So Paulo, School of Public Health (So Paulo, Brazil). The Finest Tuned Clocks: Biological Rhythms & Epidemics.
- 2017 | Oxford University (Oxford, United Kingdom). Biological Rhythms in Health & Disease. Oxford Chronobiology and Sleep Medicine Summer School.
- 2017 | Lorentz Center (Leiden, Netherlands). Microbial Darwinian Medicine: A Workshop at the Interface of Medicine and Microbial Eco-Evolutionary Biology. Opportunities for Integrating Biological Rhythms into Evolutionary Medicine
- 2017 | University of Tokyo (Tokyo, Japan). UTokyo-Princeton International Workshop of Infectious Disease Modeling: Infectious Diseases in Aging Populations: Unifying Statistical and Dynamical Approaches. New Ways of Deploying Old Tools: Maternal Immunity & Infant Vaccination
- 2016 | Netherlands National Institute for Public Health and Environment (RIVM), Epidemiology Seminar. Dynamics of maternal antibodies against measles, consequences for an optimal vaccination schedule.
- 2016 | University of Groningen, Biology Seminar. Biological Rhythms & Infection Dynamics Across Scales.
- 2016 | ETH Zurich Theoretical Biology Seminar. Biological Rhythms & Infection Dynamics Across Scales.
- 2015 | Center for Immunity, Infection and Evolution Winter Symposium: Circadian Rhythms in Health & Disease, invited talk (Edinburgh, Scotland). The Seasonality of Infectious Diseases: Disease Ecology meets Chronobiology.
- 2015 | Chumakov Institute of Poliomyelitis and Viral Encephalitides, Seminar (Moscow, Russia). Polio from Past to Present: Ecology Informs the Polio Endgame.
- 2014 | University of Glasgow, Institute of Biodiversity, Animal Health and Comparative Medicine, Seminar (Glasgow, Scotland). The Role of Demography, Seasonality, and Spatial Structure in Disease Dynamics: Unraveling the Ecology of Polio.
- 2014 | Imperial College London, Department of Infectious Disease Epidemiology, Seminar (London, England). Using Historical Epidemics to Unravel the Transmission Dynamics of Polio.

National Presentations

- 2017 Harvard T.H. Chan School of Public Health Annual Conference to Increase Diversity in Mathematical Modeling & Public Health. New Ways of Deploying Old Tools: Using Maternal Immunity to Improve Infant Vaccination.
- 2017 American Mosquito Control Association Annual Meeting. Reconstructing Spatiotemporal Patterns of Vector Abundance via Online Data Sources.
- 2016 Harvard University T.H. Chan School of Public Health, Outreach Conference to Increase Diversity in Mathematical Modeling & Public Health. Seasonality of Infectious Diseases: Individuals to Populations.
- 2016 Harvard University T.H. Chan School of Public Health, Outreach Conference to Increase Diversity in Mathematical Modeling & Public Health. Navigating Grad School and Beyond.
- 2015 Ecology and Evolution of Infectious Diseases (EEID) Conference. Both Salk and Sabin Vaccines Effectively Reduce Polio Transmission in Epidemic Settings.
- 2014 Ecology and Evolution of Infectious Diseases (EEID) Conference. Perpetuation of Polio: Silent Infections and Source-Sink Dynamics.
- 2013 Ecology and Evolution of Infectious Diseases (EEID) Conference. Seasonality of Births in the US & Worldwide and its Role in Childhood Disease Dynamics. Co-presented with Kevin M. Bakker.
- 2012 EEID Conference. Can Human Phenology Drive Infectious Disease Dynamics?
- 2011 EEID Conference. Spatiotemporal Dynamics of Polio Virus: Epidemics of the Past and Eradication for the Future.
- 2010 Ecological Society of America National Conference. Disease Emergence in a Changing World: Ecological Dynamics of Polio in the US 1910–1980.
- 2010 Society for the Advancement of Chicanos and Native Americans in Science (SACNAS) National Conference. Disease Emergence in a Changing World: A Historical Investigation of the Ecological Dynamics of Polio in the US 1910-1980.
- 2009 SACNAS National Conference. Population Structure of an Arctic Ice Seal.
- 2009 American Society of Mammalogists. Population structure of an Arctic Ice Seal: Support for Conservative Management
- 2008 Ecological Society of America Annual Conference. Impact of Climate Change on Ice-associated Seals: Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2008 American Institute of Biological Sciences Annual Conference. Seasonal Haulout Patterns of Ringed Seals and the Possible Impacts of Climate Change.
- 2006 National Oceanic and Atmospheric Administration Educational Partnership Program Annual Meeting. Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).

Departmental Seminars & Regional Presentations

- 2018 | Princeton University, Global Health Colloquium. Hacking Epidemics: Leveraging Clinical, Cross-sectional, and Time Series Data to Infer Cross-scale Disease Dynamics
- 2017 | Columbia University Mailman School of Public Health, Dean's Grand Rounds Seminar. Eradicating Epidemic Diseases.
- 2017 | The NIEHS Center for Environmental Health in Northern Manhattan Annual Retreat. New Ways of Deploying Old Tools: Revisiting the Infant Vaccination Schedule.
- 2017 | University of Alaska Southeast, Evening-at-Egan Lecture Series. The Clockwork of Epidemics, Health & Disease.
- 2017 | Columbia University Dept. of Environmental Health Sciences. Environment, Rhythms & Disease: Exploring Intra- and Intergenerational Infectious Disease Dynamics.
- 2017 | Harvard School of Public Health. The Finest Tuned Clocks: Biological Rhythms & Epidemics.
- 2017 | The Hutchinson Institute. The Finest Tuned Clocks: Biological Rhythms & Epidemics.
- 2017 | Department of Ecology and Evolutionary Biology at Princeton University, Colloquium on the Biology of Populations Seminar Series. The Finest Tuned Clocks: Biological Rhythms & Epidemics.
- 2017 | Department of Public Health at Columbia University. The Finest Tuned Clocks: Biological Rhythms & Epidemics.
- 2016 | Princeton Strategic Partnership Grant Workshop in collaboration with the University of Tokyo. Seasonality of Infectious Diseases: Individuals to Populations.
- 2015 | University of Michigan School of Public Health MAC-EPID Symposium Workshop: Eradicating Polio: Scientific Opinion and Political Will. The Efficacy of Salk and Sabin Polio Vaccines during Vaccine Roll-out in the US and USSR.
- 2015 | US Centers for Disease Control and Prevention (CDC) Division of Viral Diseases. The Efficacy of Salk and Sabin Polio Vaccines during Vaccine Roll-out in the US and USSR.

- 2010 | University of Michigan Ecology & Evolutionary Biology Theory Group Lunch Seminar. The Dynamics of Polio in the US 1910–1980.
- 2009 | University of Georgia Odum School of Ecology, Computational Ecology Luncheon. The Dynamics of Polio in the US 1951–1980.

Departmental Seminars & Regional Presentations Continued...

- 2008 NIH Intramural NIAID Research Opportunities 2008 Summer Student Research Symposium. A Survey of Relapsing Fever near Flathead Lake, MT.
- 2008 West Coast Biological Sciences Annual Undergraduate Research Conference. Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2007 North Slope Borough Fish & Wildlife Management Annual Meeting. Ringed Seal Population Structure; Impacts of Diminishing Snow Cover.
- 2007 A Joint Meeting of the Alaska Chapter of the Wildlife Society and the 12th Northern Furbearer Conference. Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2007 University of Alaska Southeast Global Information Systems Student Research Showcase. Breeding site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2007 University of Alaska Southeast 50th Anniversary Faculty Research Showcase. Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2006 University of Alaska Southeast Fall Convocation Faculty Research Showcase. Breeding Site Fidelity and Philopatry in Ringed Seals (*Phoca hispida*).
- 2006 University of Alaska Southeast NSF REU Program Research Showcase. Satellite Tracking of Ringed Seals (*Phoca hispida*).
- 2005 National Institutes of Health & the University of Colorado Cancer Center Student Fellowship Forum. P-element Mutagenesis in *Drosophila melanogaster* for the study of Segregation Distortion.
- 2005 Colorado State University Pueblo Student Research Symposium. P-element Mutagenesis: Identifying Mutations that Interact with Segregation Distortion in *Drosophila melanogaster*.

Awards

2015	Rackham Graduate Student Research Grant (\$3000)
2015	University of Michigan AGEP Research Travel Award (\$500)
2014	University of Michigan Ecology and Evolutionary Biology Dept. Best Student Paper Award (\$500)
2014	Rackham Graduate Student Research Grant (\$3,000)
2012–2013	University of Michigan, Rackham Travel Grant
2011	NSF Ecology and Evolution of Infectious Disease Workshop Scholarship
2009	SACNAS National Conference Undergraduate Poster Award for Polar Sciences
2009	Alaska EPSCoR Landscape Genetics Scholarship, American Society of Mammalogists Annual Meeting
2009	University of Alaska Southeast Outstanding Graduate in Natural Sciences
2009	University of Alaska Southeast, Graduated Magna Cum Laude
2007–2009	Cooperative Institute for Arctic Research: International Polar Year Fellowship
2007–2009	University of Alaska Southeast Arts & Science Student Scholarship
2008	NIH, Intramural NIAID Research Opportunities Program Travel Award
2006–2007	National Science and Mathematics Access to Retain Talent (SMART) Grant
2005–2007	Hispanic Scholarship Fund Scholarship
2007	Southeast Alaska Conference Scholarship
2007	University of Alaska Student Government Scholarship
2007	University of Alaska TRIO Program Grant Recipient

Research & Professional Experience

current	Columbia University, Dept. of Environmental Health Sciences Assistant Professor.
current	Reviewer Ad hoc reviewer for PNAS, Proceedings of the Royal Society B: Biological Sciences, Journal of the Royal Society Interface, Emerging Infectious Diseases, The American Naturalist, BMC Medicine, American Journal of Human Biology, among other journals.
2015–2017	Princeton University, Ecology & Evolution, Associate Research Scholar Professional researcher appointment.
2015–2016	Princeton University, Ecology & Evolution, Postdoctoral Fellow NSF postdoctoral fellow. Research project: "Effects of maternal antibodies on offspring survival and health."
2010–2015	University of Michigan, Ecology & Evolution, PhD Program Graduate student under the advisement of Pejman Rohani and Aaron A King. Dissertation committee members: Pejman Rohani, Aaron A King, Mercedes Pascual, and Betsy Foxman.
2013–2014	University of Michigan, Ecology & Evolution, Grad Student President President of EEB graduate students for the 2013–2014 academic year.

Research & Professional Experience Continued...

- 2011–2012 **University of Michigan, Ecology & Evolution, Admissions Committee**
Student representative on the EEB PhD admission committee.
- 2011 **University of Michigan, Graduate Student Instructor**
EEB/ENVIRON 315: Ecology and Evolution of Infectious Diseases
- 2010 **University of Michigan, Graduate Student Instructor**
BIOL 130: Animal Behavior
- 2009–2010 **Research Assistant, University of Georgia & University of Michigan**
Lab of Pejman Rohani University of Georgia Odum School of Ecology, followed by the University of Michigan Ecology & Evolutionary Biology Department.
- 2010 **Summer Field Assistant**
Assisted Daniel Streicker (University of Georgia) with field research on vampire bat rabies in Peru.
- 2006–2009 **Research Assistant, University of Alaska Southeast**
Labs of David Tallmon and Brendan P. Kelly, Department of Biology.
- 2008 **Summer Research Assistant, National Institutes of Health**
Lab of Tom Schwan, Medical Entomology Section of the Laboratory of Zoonotic Pathogens, Rocky Mountain Laboratories, National Institutes of Allergies and Infectious Diseases, National Institutes of Health
- 2008 **Field Research Course, Interdisciplinary Sea-Ice Research, University of Alaska Fairbanks**
Field techniques in geophysical, biological, and biogeochemical sea-ice research
- 2007 **Research Assistant, National Oceanic & Atmospheric Administration**
NOAA Living Marine Resources Cooperative Science Center biodiversity research cruise in the North Atlantic Ocean, NOAA Vessel Albatross IV.
- 2007 **Field Assistant**
Assisted Andrew Whiteley (University of Alaska) with field research on phenotypic plasticity in coast range sculpin in Glacier Bay National Park.
- 2006 **NSF REU Summer Research Student, University of Alaska Southeast**
Lab of Brendan P. Kelly
- 2005–2006 **Research Assistant, Colorado State University - Pueblo**
Lab of Janna McLean
- 2004 **Summer Research Student, Colorado State University - Pueblo**
National Institutes of Health Bridges to Biomedical Careers Program
